Re: *Hill's Pet Nutrition, Inc. Recall Update*

Dear Valued Partner:

As you may have heard, there were media reports today of an expanded wheat gluten ingredient recall by a supplier with further recalls by Menu Foods. Hill's Pet Nutrition, Inc. wants to assure you that this announcement has **no** impact on Hill's products.

As stated in earlier communications, Hill's previously voluntarily recalled or withdrew all products in the United States and Canada that contained the ingredient wheat gluten. As a result of these precautionary measures, all the products that Hill's continues to sell do not contain wheat gluten ingredients from any supplier.

For more information about Hill's previous voluntary and precautionary recall of Hill's Prescription Diet® m/d® Feline Dry food and Hill's Science Diet® Feline Savory Cuts® canned food, please visit www.hillspet.com. Veterinary professionals can also contact us at 1-800-548-8387.
