Hello everyone,

This is my last President’s Report! My year as LVMA president is coming to a close and officially ends at our Winter Meeting in New Orleans. We are looking forward to a record breaking crowd at the meeting to welcome Dr. Christie McHughes as the 2018-2019 LVMA President. In all seriousness, I have really enjoyed representing our organization and working with our outstanding executive director Bland O’Connor and association coordinator Stephanie Karaty. The veterinarians that make up the LVMA Board have been encouraging and their wise leadership is a tremendous asset to our state.

Current news:

Power of 10: Congratulations to our new facilitators, Drs. Amanda Perkins, Kathleen Elstrott and Margaret Hartdegen! We appreciate each of you and thank you for stepping up and taking on that new role for LVMA. The 2018 Power of 10 kickoff weekend is set to start February 16-18.

Meeting: If you have not registered, please do so TODAY! We invite you to join us for the Speed Networking event on Saturday at 5:30pm. This is an opportunity for DVM students to come in and have one on one time with a variety of veterinarians to ask questions and to seek guidance. I will be there and I hope you will be too. Please RSVP using the email that was sent by the office about registration. We can’t wait to see you in New Orleans!

Membership: Membership renewal forms were mailed out a couple of weeks ago. Please be sure to update your contact information so that the LVMA can send you important updates and so we know how to reach you. We value our members and really appreciate each and every one of you. Thank you for being a member of the LVMA!

Highlights from 2017:

- Our first Power of 10 Class is set to graduate at the Winter Meeting. The feedback from the participants has been very positive and we look forward to continuing the program next year.

- We appointed, nominated or filled positions on the Louisiana Board of Veterinary Medicine, the WJE Committee and the Louisiana Animal Control Advisory Task Force. We also welcomed new LVMA District Representatives, District 2—Rep Dr. Julie Roane; District 3—Rep Dr. Jesse Brandon and District 4—Rep, Dr. Jason Poynter. Again I am thankful for the veterinarians in our state that are willing to support organized veterinary medicine on behalf of all of us.

- LSART deployed during Hurricane Harvey to assist with evacuation efforts and animal rescue. Also following Hurricane Harvey a very generous donation was made to Texas veterinarians from the WJE Foundation.

- As always our legislative committee monitored and remained engaged with our lobbyists on behalf of veterinarians and our profession.

- The LVMA has a new mission statement and logo. I encourage you to check out these out on the new updated LVMA website!

I hope your holiday season is joyous and thank you for allowing me to serve as your president.

Kindest regards,

Marion Sewell, DVM
LVMA President

At Southern Veterinary Eye Care we are committed to providing the highest quality veterinary ophthalmic care to our patients in a compassionate environment, while keeping our clients and referring veterinarians well informed during the treatment process.

We believe that as a referring veterinarian you deserve to be able to refer a case without it slowing down your day. That is why we offer same day appointments and around the clock ocular emergency availability.

Now seeing cases in the Greater New Orleans Area. Please call for Details!

SOUTHERN VETERINARY EYE CARE OFFERS A WIDE RANGE OF MEDICAL AND SURGICAL THERAPIES TO HELP IMPROVE VISION AND COMFORT:

- Micro-incision cataract surgery with artificial lens implantation
- Corneal repair and reconstruction
- Eyelid and nasolacrimal repair and reconstruction (Entropion, Ectropion, Medial Canthal Closure)
- Lid mass removal
- Glaucoma surgical and medical management
- Dry eye surgical (Parotid Duct Transposition) and medical management
- Prolapsed gland of the third eyelid repair (Cherry Eye)
- Intra-ocular prosthesis surgery
- Enucleation (eye removal) with intra-orbital implant
- Medical therapy for inflammatory and infectious eye diseases
- Emergency eye care 24 hours a day and 7 days a week
- Breed eye certifications
- Full Ophthalmic Examinations (Slit Lamp Bio-Microscopy, Retinal Exam) with diagnostic testing (Intraocular Pressure Measurement, Tear Testing, Fluorescein Staining)
- Gonioscopy (Diagnosing the Potential for Glaucoma Susceptibility)
- Retinal testing (Electroretinography)
- Ocular ultrasound

The LVMA would like to welcome our newest members to the Association! We are excited to have you as part of our team; we can’t wait to show you everything we have to offer and look forward to your contributions to the veterinary profession.

WELCOME TO THE LVMA!
As the 2017 Hurricane season comes to an end, it is time to assess LSART activities over the past year. In August the LSART VMRC was requested by the Louisiana Department of Agriculture and Forestry to assist with veterinary care for the pets sheltered with their people for Hurricane Harvey while our search and rescue equipment was sent to Texas with our response partner ASPCA. Louisiana accepted people and pets from Texas after the residents were rescued from flood waters. Two shelters were set up for the Texas residents, one in Alexandria and one in Shreveport. Over 400 animals accompanied their owners to these shelters. LDAF was able to link all of the people and pets together. The LSART Veterinary Medical Reserve Corps veterinarians were able to offer microchipping and vaccinations to the Texas residents through a generous donation of supplies from AVID, Boehringer Ingelheim, and Elanco. Dr. Brandy Duhon from the LSU Shelter Medicine Program managed the veterinary station at the Alexandria Shelter. Dr. Wendy Wolfson brought veterinary students from the program to assist our VMRC veterinarians. The LSART trailer served as the medical station in Alexandria and was on standby to transport pets back to Texas. LSART assisted with the return of pets back to Texas, Acadia Animal Aid and Wild Cat Foundation also assisted by providing transport for pets. LSART VMRC identified veterinary clinics near each shelter willing to assist in housing pets with medical needs. One pet in particular required intense care and medical transport. He had a seizure as he was rescued. This dog had seized in the past but did not require medication prior to the hurricane. The pet was stabilized then transported with their owners from a Lake Charles veterinary clinic to a veterinary clinic near the Alexandria Shelter and then finally back to a veterinary clinic near the shelter in Texas. At each step of the way the pet was accompanied by a veterinarian ready to assist if the seizures reoccurred. Thanks to our volunteer veterinarians and the veterinary facilities that agreed to assist, pets were linked and kept safe, close to their owners. A special thank you goes out to the Pet Emergency Clinic of Lake Charles, Animal Emergency Clinic of Shreveport as well as the Crossroads Emergency Clinic in Alexandria for donating care for the hospitalized pets from search and rescue and the two shelters. Texas has always helped Louisiana in our times of need during disasters. It was very rewarding to be able to reciprocate.

After the Harvey Response LSART was requested to provide a pet shelter training for LDAF personnel. Since many of the LDAF personnel had just come from sheltering pets of Hurricane Harvey the training became an exchange of best practices for pet sheltering in Louisiana. In May LSART Veterinary Medical Reserve Corps Team held an Incident Command System ICS/ Incident Management Team Training in Baton Rouge. After the Aug 2016 Flood we realized the need for more ICS training. Participants were veterinarians, vet techs and animal handlers for both companion animals as well as large animals. The VMRC members learned about critical incident reporting as well as following proper chain of command. The course was taught by Dr. Dick Green from ASPCA, one our response partners and Dr. Renee Poirrier.

LSART Veterinary Medical Reserve Corps Team participated in a full-scale exercise in Tangipahoa Parish as part of a national grant secured by Louisiana Dept. Of Agriculture and USDA. The purpose of the grant is to provide a national standard for Cohabitated Sheltering in the event of a natural disaster. LSART VMRC Team was able to provide the use of our Response trailer and a support team that allowed role players to use their own pets as part of the exercise. The goal of the exercise was to put scenarios into play that demonstrated common situations encountered during a disaster. LSART VMRC with several nearby animal control agencies as well as rescue organizations provided 20 dogs and their owners to participate as role players. The LSART trailer was present to provide a quiet, cool area for pets and owners in case of distress. The LSART Admin team was able to coordinate the scenarios and coach the owners to act according to their scenario. Scenarios included simple situations such as 1 owner and 1 small pet and more complex scenarios such as families with multiple pets or owners with pets that may be health or safety risks to other occupants of the shelter. This exercise also included multi-level coordination of non-governmental agencies, local, state and federal agencies. It was a great success. We were able to work through many issues we identified at Celtic studios for the Aug 2016 Louisiana Flood.

On April 1st, the Louisiana State Animal Response Team VMRC in conjunction with the Louisiana Department of Agriculture and Forestry provided a just-in-time pet training for the Louisiana National Guard. Our National Guard are always on the front lines of evacuations and rescues, including pet owners and pets needing assistance. For the last several years LSART has provided this training at the LANG’s yearly exercise. In the 2016 August Floods, over 3000 pets were taken out with owners by the National Guard, Louisiana Wildlife and Fisheries and the US Coast Guard. The goal of this training has been to make evacuations and rescues safer for everyone.

- Through the use of scenario-based training, the Guard was provided with practical information about safer ways to assist pet owners and pets during evacuations and rescues.
- The training focused on assisting owners to handle their own pets, the use of carriers, transport cages and cat sacks to confine pets, and methods of keeping the animals safe and calm during transport.
- The training helps the Guard to identify and mitigate potential conflicts between pets, owners, and non-pet owners.
- The training provided information on what to do if people are bitten by pets.
- The training provided information on how to work with service animals and their owners.
- Over 60 guardsmen were trained at two sites this year.

In April LSART also received a grant to train Veterinary Technicians Students from Nicholls State University with a day of Pet Evacuation and Shelter training and a second day of Emergency Planning for Animal Businesses. These trainings were funded by a grant secured through NSU. LSART VMRC was able to register the students into our Veterinary Medical Reserve Corps and could prove to be an incredible resource in an event.

This year LSART began a series of pet evacuation and shelter training courses across the state as part of a grant secured by American Humane. This grant allowed us to provide LSART Pet Shelter Kits to each participating parish and well as LSART Evacuation/ Shelter signs to the host parish. Over 200 people were trained by LSART through the 10 trainings we provided this year.

---

**Check it out! Upcoming Events:**

**January 26-28** – 2018 Winter Meeting hosted by the LVMA at the Astor Crowne Plaza in New Orleans, LA. For more information visit LVMA.org

**April 28-29** – San Diego County VMA Veterinary Conference at Handlery Hotel in San Diego, CA. For more information visit SCDVMA.org
